

Max Planck discovered it. And his colleagues saw the light !

ISO 9001
certified

532 nm (green)
473 nm (blue)
1064 nm (IR)

Max Planck recognized: for the best results the radiation should have the suitable quantum. That's why our low-noise **SOLID STATE LASERS** have high efficiency and excellent beam quality while offering compact dimensions at the same time (power range 1-200 mW resp. 0,5-2 W cw). And: to get the best results without limits, we offer custom made solutions when large quantities are required. This we guarantee.

DIODE PUMPED SOLID STATE LASERS by Bremlas
Lasertechnik - the right quantum for your success.
